To run the Osprey

1. Turn off the TCS power.
2. Via the A/B switch, switch the serial ports to the B setting.
3. Swap the Osprey QBUS card which is in a dummy slot (Slot2 E, F) with the QBUS extender card (Slot1 C, D).
4. Turn on the TCS power.
5. If the T5 machine is off, login under administrator with the password irtftcs!
6. Click the osprey icon on the desktop. Osprey/TCS will then boot.
