

Block Diagram of a Single APE Axis.

Location of HA APE

This section provides visual context for the HA APE electronics. It features a central diagram of a yoke section with cardinal directions **S** (South), **N** (North), **E** (East), and **W** (West) marked. The electronics are located on the north-west section. Three photographs are included:

- A person in a blue shirt is shown accessing a door on the yoke structure. A callout box states: "Dec Ape Electronics is located inside the yoke. Access via this door."
- A close-up photograph of the HA APE electronics housed in a clear plastic enclosure. A callout box states: "Close up of the HA APE electronics".
- A photograph showing the electronics mounted on an orange yoke section. A callout box states: "HA APE Electronics is mounted on the north-west yoke section."

 A fourth callout box points to the central diagram: "Dec transducer / resolver and preamp is accessed from inside the mirror cell."
